

Mark Nalbach

Frontend Engineer

marknalbach@gmail.com • (715) 498-8376 • marknalbach.dev

Professional Summary

Frontend Engineer with 15+ years building interactive digital products and software experiences. Experienced in React, TypeScript, React Native, Expo, Firebase, Cypress automation, AI-assisted development, and product-focused engineering. Passionate about creating polished user experiences that balance usability, engineering quality, and business value.

Technical Skills

Frontend: React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Mobile: React Native, Expo, iOS, Android

Testing & Quality: Cypress, End-to-End Testing, Test Automation, Release Support, Quality Engineering

Backend & Services: Firebase, Firestore, Authentication, REST APIs

Tools: GitHub, GitHub Actions, VS Code, Vite, Expo EAS

Professional Experience

Frontend Engineer | EverFi | 2015–Present

- Build and maintain React applications, reusable component systems, and user-facing product features.
- Develop and maintain Cypress automation suites that improve release confidence and reduce manual testing effort.
- Investigate test failures, release issues, and product defects to help improve software quality.
- Partner with product, design, and engineering teams to deliver polished user experiences and workflow improvements.
- Contribute to automation coverage initiatives and quality-focused engineering practices.

Developer | Workplace Answers | 2010–2015

Developed interactive digital learning experiences and educational software, helping transform learning content into engaging, user-focused products.

Owner | Video Production & Motion Graphics Business

Produced animation, motion graphics, and visual effects projects while developing a strong foundation in visual communication, creative problem solving, and user-focused design.

Recent Independent Projects

- **US Brew Passport** — Cross-platform brewery rewards and discovery application built with React Native, Expo, Firebase, and RevenueCat.
- **Potty Pal** — Community-driven restroom discovery application featuring maps, geolocation, reviews, ratings, and Firebase-backed content.
- **Phase Forge** — Interactive browser-based card game demonstrating advanced frontend engineering, drag-and-drop interactions, state management, and responsive design.
- **Mark Nalbach Studio** — Interactive engineering portfolio featuring AI-powered exploration, local browser-based AI, project showcases, and production-minded frontend architecture.

Highlights

- 15+ years building interactive digital products and software experiences
- 10+ years building production React applications
- Extensive Cypress automation and quality engineering experience
- Designed, built, and deployed cross-platform mobile applications
- Strong focus on frontend architecture, UX, and product development
- Experience integrating AI-assisted workflows into software development
